WANT TO BE A HOST ORGANIZATION?

ABOUT

E+I Fellows is a program designed to help local startups, small businesses, and nonprofits in the region by placing Grove City College students with local organizations that desperately need students' contributions and expertise in their disciplines. E+I pays Fellows $15/hour to help increase organizational capacity, health, and growth.

VISION

Nonprofits, startups, and small businesses can apply and receive much-needed help without the financial burden of hiring traditional interns and employees. This program allows students to access greater opportunities while fostering regional economic development and prosperity. Organizations will work with E+I to craft customized project plans and receive continuous support via regular check-in meetings.

IMPACT

Organizations will have a stronger workforce with relevant technologies, much-needed knowledge, and skills from talented Grove City College students. Thriving businesses mean more job opportunities and an increased ability to deliver services and support to the local community. At-risk organizations will become more viable and sustainable as a result.
