

ALUMNI BUSINESS SPOTLIGHT

Daisy POPS

About Daisy Pops

Daisy Pops offers a wide variety of cake pops, all made lovingly by hand. Whether you need themed cake pops for a holiday party or custom cake pops for a special event, Daisy Pops can provide the perfect sweet for the occasion. Daisy Pops mission is to add a little extra joy to their customers' days, one cake pop at a time.

A Brief History

When Amy Mucha '09 graduated from Grove City College with a degree in Math Education, she had no idea that she would someday start her own business. While she was working as a teacher, Amy's mother-in-law gave her a cake pop recipe book. In 2016, Amy made cake pops as gifts for her children's preschool teachers, and they were so well received that her hobby became a side hustle.

COVID-19 increased the demand for individually wrapped treats while simultaneously preventing Amy from teaching in person. In May 2021, Amy made the tough decision to retire from teaching and shift her focus toward Daisy Pops due to the business's rapid growth.

The business has grown from a small side hustle to having its own storefront in Kent, Ohio. Here, customers can purchase or pick up cake pops, as well as host parties. Daisy Pops goes beyond just making and selling cake pops; they create an experience that is full of joy.

Amy is also the owner and founder of Daisy Makes. Daisy Makes designs, manufactures, and sells production-ready tools for cake pop artists and small baking businesses. In 2025, Amy patented the the Daisy Makes Original Popper® System. Made up of three intentionally designed, 3D-printed components, the Original Popper® System has helped bakers across the world make uniform cake pops with ease.

ADDING A LITTLE POP OF JOY TO PEOPLE'S LIVES
